## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are for:

Hydrophillic gelling agent (claims 33-40), lamellar filler (claims 43-49), pulverulent phase (claims 50-57), salts (claims 60-62), physiologically acceptable medium (claim 30), cosmetically acceptable medium (claim 30), water-soluble dye (claim 65), solvent (claims 66-67), oil (claims 68-74), and additional compound (claim 81).

Applicant is required, in reply to this action, to elect a single species **for each of the above groups** to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
